

# A First Course in Pharmacokinetics and Biopharmaceutics

[David Bourne, Ph.D.](#)

A much more up-to-date version of this course is available at [Basic Pharmacokinetics](#)

This course and more is now available on CD.

[For details](#)

---

- [1. Introduction to Course](#)
  - [Staff](#)
  - [Grading](#)
  - [Coursework](#)
  - [Laboratory Experiments](#)
  - [Textbook](#)
  - [Other References](#)
  - [Journals](#)
- [2. Background Material](#)
  - [Exponents](#)
  - [Logarithms](#)
    - [Semi-log graph paper](#)
  - [Calculus](#)
    - [Differential Calculus](#)
    - [Integral Calculus](#)
  - [Spreadsheet Calculations](#)
  - [Spectrophotometric Analysis](#)
- [3. Pharmacokinetic Introduction](#)
- [4. One Compartment I.V. Bolus](#)
  - [Assumptions](#)
  - [First-order kinetics](#)
  - [Plasma data](#)
  - [Area under the Curve](#)
  - [Half-life](#)
- [5. Analysis of Urine Data](#)
  - [Excretion Unchanged - No Metabolism](#)
  - [Metabolism and Excretion - Parallel Pathways](#)
  - [Clearance, CL](#)

- 6. Intravenous Infusion
  - Continuous infusion - steady state
  - Combined Infusion and bolus administration
  - Combined slow and fast infusion
  - Post infusion
- 7. Routes of Drug Administration
  - Oral
  - Buccal/Sublingual
  - Rectal
  - Intravenous
  - Subcutaneous
  - Intramuscular
  - Inhalation
  - Topical
  - Other ROA's
- 8. Pharmacokinetics of Oral Administration
  - Differential equation
  - Integrated equation
  - Absorption rate constant,  $k_a$
  - Extent of absorption
- 9. Calculation of Bioavailability Parameters
  - Calculation of  $k_a$
  - Calculation of F
- 10. Bioavailability Studies
  - Definitions
  - Past bioavailability problems
  - Reasons for bioequivalence requirements
  - Bioavailability study characteristics
- 11. Physiological Factors Affecting Oral Absorption
  - Membrane physiology
  - Gastrointestinal physiology
- 12. Physical-Chemical Factors Affecting Oral Absorption
  - pH - partition
  - Drug dissolution
- 13. Formulation Factors
  - Solutions
  - Suspensions
  - Capsules
  - Tablets
  - Sustained release tablets
  - In vitro dosage form testing
- 14. Multiple IV Bolus Dose Administration
  - Single dose summary
    - IV bolus
    - IV infusion

- [Oral administration](#)
- [Multiple IV bolus](#)
  - [Independent doses](#)
  - [Accumulating doses](#)
  - [Development of general equation](#)
  - [Cpmax and Cpmin equations](#)
- [15. Multiple Oral Dose Administration](#)
  - [Cpmin equation](#)
  - [Average Cp equation](#)
  - [Non-uniform dosing intervals](#)
- [16. Routes of Excretion](#)
  - [Renal excretion](#)
  - [Hemodialysis](#)
  - [Biliary excretion](#)
  - [Pulmonary excretion](#)
  - [Salivary excretion](#)
  - [Renal disease considerations](#)
    - [Dose adjustment](#)
    - [Average Cp calculations](#)
    - [Cpmax/Cpmin calculations](#)
- [17. Metabolism](#)
  - [Metabolic reactions](#)
    - [Phase I](#)
    - [Phase II](#)
  - [Induction](#)
  - [Inhibition](#)
  - [Hepatic clearance](#)
  - [Systemic availability](#)
- [18. Drug Distribution](#)
  - [Drug distribution patterns](#)
  - [Factors affecting drug distribution](#)
    - [Rate of distribution](#)
    - [Extent of distribution](#)
  - [Weight considerations](#)
  - [Protein binding interactions](#)
- [19. Multi-Compartment Pharmacokinetic Models](#)
  - [Intravenous administration](#)
    - [Scheme or diagram](#)
    - [Differential equation](#)
    - [Integrated equation](#)
    - [Parameter determination](#)
    - [Effect of  \$k\_{12}\$  and  \$k\_{21}\$](#)
    - [Apparent volumes of distribution](#)
    - [Dosage calculations](#)
  - [Oral administration](#)

- [Non Compartmental Analysis](#)
  - [20. Non-Linear Pharmacokinetic Models](#)
    - [Scheme or diagram](#)
    - [Differential equation](#)
    - [Parallel pathway](#)
    - [Dosing approaches](#)
  - [21. Clinical Applications of Pharmacokinetics](#)
    - [Therapeutic drug monitoring](#)
    - [Pediatric considerations](#)
    - [Geriatric considerations](#)
  - [22. Laboratory Assignments](#)
    - [Introduction](#)
    - [Analysis of drugs by visible spectroscopy](#)
    - [Extraction of salicylic acid](#)
    - [One compartment model - IV bolus](#)
    - [One compartment model - IV infusion](#)
    - [One compartment model - Oral](#)
    - [Computer simulation - single dose](#)
    - [Student presentation concerning Biopharmaceutics](#)
    - [One compartment model-IV bolus- multiple dose](#)
    - [Computer simulation - multiple dose](#)
    - [Computer simulation - two compartment models](#)
    - [Student presentations on Pharmacokinetics](#)
    - [Pharmacokinetic simulations using MacDope](#)
- 

## Exams and Homework Sets (with answers)

### Exams (1995)

- [First Exam](#)
- [Second Exam](#)
- [Final Exam](#)

### Homework Sets (1995)

- [Chapter 4](#)
- [Chapter 5](#)
- [Chapter 6](#)
- [Chapter 8](#)
- [Chapter 15](#)
- [Chapter 20](#)

### Homework Sets (1997)

- [Chapter 4](#)
- [Chapter 5](#)
- [Chapter 19](#)
- [Chapter 20](#)

**[Java Applets - On line Graphs](#)**

**[JavaScript Calculators Online](#)**

---

## **The Development Team**

- David Bourne - Principal Investigator, Content, Webmaster
  - Geoffrey Bourne - some HTML formatting, Graphics conversions, C-programmer
  - Andy Nguyen - some Graphics
  - Henry W. Kinnard, Jr. - some HTML formatting
-
